

INSIGHT

YOUR STRATEGIC R & D TAX INCENTIVES PARTNER

Company Overview

Are you aware of the financial support that may be available to your company through government R & D Tax Incentives?

Perth | Sydney | Melbourne

Insight Business is your strategic partner in this field.

Profile

We are one of Australia's leading R & D tax incentive consultancies.

Many businesses are unaware of the financial support available to them through R & D Tax Incentives. Others simply do not have the in-house capabilities to make a claim.

Insight Business is your strategic partner in this field.

Since 2001, we have been helping Australian businesses grow through the realisation of tax incentive programs.

We draw on our deep knowledge of government legislation, and our financial and sector-specific expertise to optimise your claim whilst taking the utmost care to minimise any risk to your business in relation to your R & D tax incentive submission. With our help, your company can reach its full potential.

R & D claims are all we do. This ensures a complete focus on your claim by our team of industry-specific experts so you get the maximum amount back.

OUR VISION

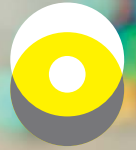

is to be recognised as Australia's elite R & D tax incentives advisory organisation.

OUR MISSION

is to connect companies of all sizes with R & D tax incentives to help drive their growth.

Points of Difference

This company overview showcases our true talent and point of difference from our competitors, which is our team.

Our main points of difference are:

Superior Capture

The experience of the senior project managers & project managers at Insight ensures unequalled expense capture and technical expertise which limits your resource requirements to get the claim done.

Real Time

We prefer to work on live claims and capture the expenses as they happen in real time.

Lower Costs

Our pricing is competitive, we do the claim and let you get on with your core business.

Focus

R & D Incentives are all we do. We are not an accounting firm yet most of our work is referred to us by accountancy firms.

Value add

Insight actively keeps an eye out for commercial opportunities for our clients, plus an extensive network of professionals to call upon for any companies needs if required.

Quality

Insight Business internally audits all of its claims via an experienced R & D Tax Specialist prior to lodgement.

Services

We specialise in all aspects of identifying and collating your R & D claim.

Our services include:

Eligible activities and expenditures identification and qualification

Discovery Audits

Application preparation and lodgement

Government department liaison

Audit management

R & D Tax Incentives systems, process advisory and implementation

Why Choose Us

We deliver tangible results that will improve your bottom line.

We take a strategic approach to optimise your entitlement and ensure the application process is managed in a timely manner

Our methods are detailed and conservative to ensure thorough mitigation of risk.

We also believe in taking a personal interest in our clients, and ensure you are kept up to date with your claim from the beginning of the process through to lodgement.

Areas of Expertise

Insight Business has established an outstanding reputation as one of Australia's leading R & D tax incentives specialists.

Achieving success in our chosen industry is not only our focus, it is our passion. Through that passion we have assisted a wide range of companies to claim back many millions of dollars in incentives for R & D activities each year.

Since 2001, we have created a particular niche as specialists in the R & D tax incentives field. Our exacting standards have established us as the external R & D provider of choice for many of Australia's 2nd Tier Accounting Firms.

Through the services of a close-knit team of R & D tax legislation experts, we have assisted companies operating across various sectors to recoup significant investments in R & D and vastly improve their taxation position.

We have also built an impressive track record assisting in the acquisition of wide-ranging R & D incentives in the following areas:

Biotech innovations

Medical technology

Agribusiness

Aquaculture

Pharmaceuticals

Mechanical & technical engineering

Software engineering

Renewable energy technology

Environmental services

Health sciences

Food technologies

Education industry technology

Energy systems

Oil & gas engineering

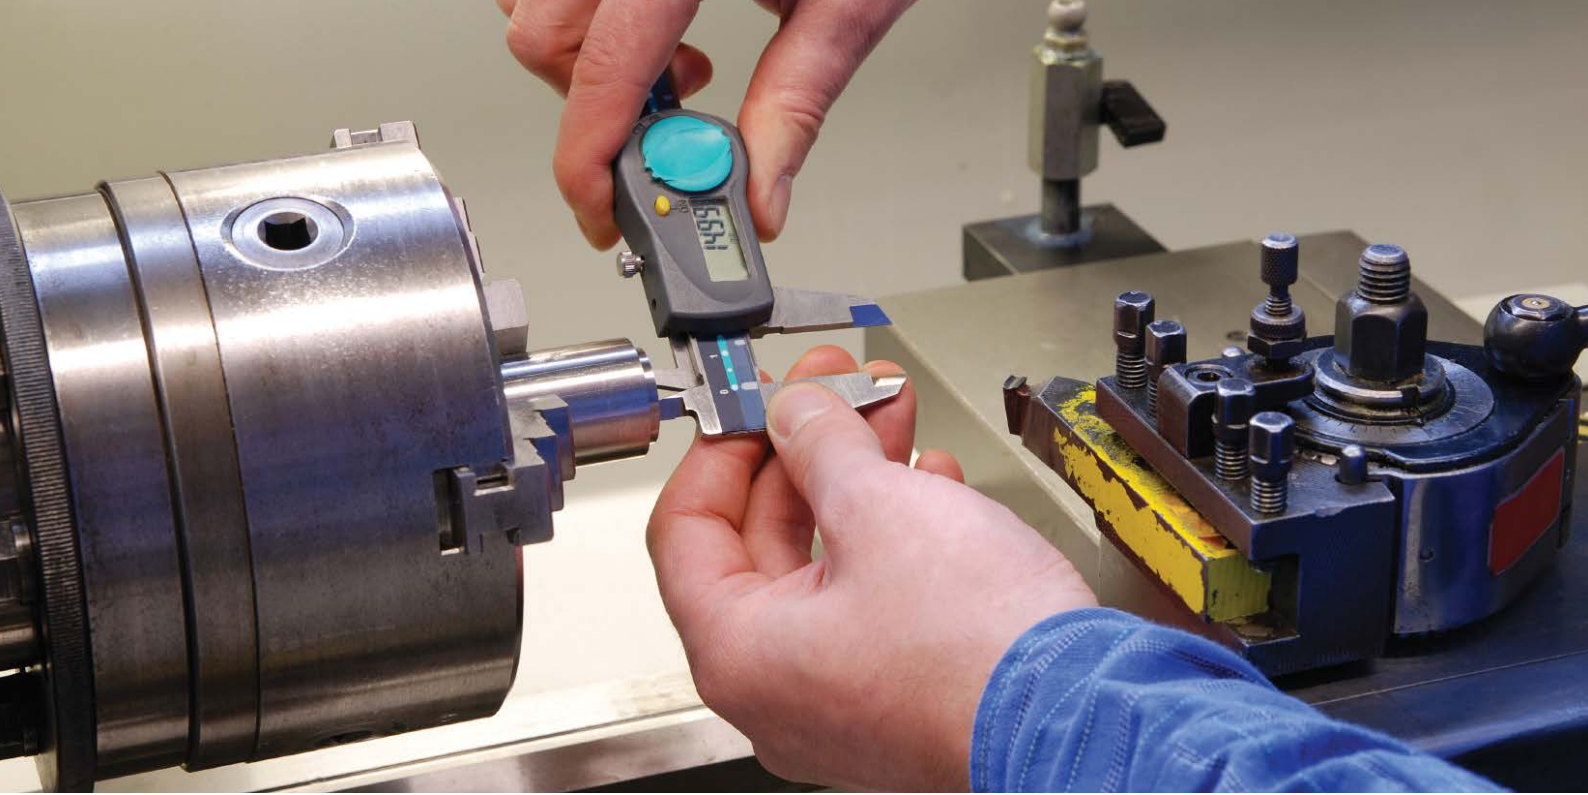

Oil & gas support services

Resource & mining innovations

Resource & mining support services

Construction solutions
